If you had to describe your company culture towards risk, how would you describe it for:

Overall corporate philosophy?

With respect to workers' compensation claims?

With respect to general liability claims?

In determining how you approach your insurance coverage what are the top 2 to 3 things that you evaluate in deciding what type of coverage to purchase?

Self-insured?

High deductible?

Excess coverage?

As to the claims administration process, how do you determine the “value” of your administrator?

What do you believe are the most critical 3 to 4 aspects that you must manage with regard to your administration process?

Workers' compensation?

General liability?

In evaluating your TCOR,
what primary aspects do
you look at?

How do you manage the message to your C- suite on:

Exposure?

Coverage?

Liabilities?

Results / state of the program?

QUESTIONS?

THANK YOU!
